

WHY US

Beyond introducing AI tools

We bridge the gap between what AI can do and what schools actually need.

Tool-first: start with an AI product, find a use case

School-first: start with the school's priorities, curriculum and workflows

Point solutions for isolated problems

Integrated AI ecosystem across people, teaching and school operations

One-time AI training

Continuous capability building through champions

Generic AI copilots

School-context AI grounded in curriculum, pedagogy and needs

Teacher or student focused

Whole-school transformation: teachers, students and operations

AI adoption without visibility

Governed adoption with policies, approved tools, data guardrails

Implementation measured by usage

Impact measured by outcomes: productivity, teaching

Standalone technology

Connected infrastructure integrated with existing tools and workflows

The Future of Schooling is AI-Native. Let's Build It Together.

Your AI Transformation Partner for schools:
deep AI expertise, combined with a real understanding of pedagogy, curriculum and classrooms.

Building AI-Native Schools

- 1 AI-Ready
- 2 AI-Enabled
- 3 AI-Native

The AI Transformation Partner for schools. Capability, tools and governance that make AI part of teaching, learning, operations and decision-making.

ABOUT US

School-first AI transformation

VISION

To build **AI-Ready → AI-Enabled → AI-Native Schools**, where AI becomes an integrated capability across teaching, learning, operations and decision-making.

Our Identity

- ✓ Deep expertise in AI transformation, technology and emerging AI capabilities
- ✓ Understanding of pedagogy, curriculum, teachers and the realities of school environments

We empower schools beyond introducing AI tools.

Our Principles

School-First, Not Tool-First

Start with the school's goals, curriculum, people and workflows.

Augment, Never Replace

AI amplifies the expertise and judgement of educators.

Outcomes Over Adoption

Success is time saved, teaching effectiveness and learning impact.

Responsible by Design

Privacy, safety, transparency, ethics and governance.

Practical Before Perfect

Real workflows and measurable improvements, today.

Built for Scale

Systems that evolve as AI, pedagogy and needs change.

OUR CAPABILITIES

Three ways we help

01 AI Education Cohorts

Empowering schools to build AI capabilities

- ✓ Future-ready staff and students using AI responsibly, confidently and productively
- ✓ AI Champions developed to lead, scale and sustain adoption
- ✓ Role-based learning focused on practical school workflows

School-wide responsible AI culture & capability

02 AI Enabled Teacher OS

Teachers equipped to plan, create and personalise learning

- ✓ More productive, personalised and data-informed educators
- ✓ Intelligent teaching workflows that reduce repetitive workload
- ✓ Curriculum-grounded AI aligned to your pedagogy and classrooms

Less admin, better learning experiences

03 AI Operating Eco-System

The infrastructure to govern and scale

- ✓ AI governance by design: policies, approved tools, guardrails
- ✓ Connected workflows with school systems (ERP, LMS, communications)
- ✓ Data-driven insights into AI adoption, usage and productivity

Connected, governed & measurable ecosystem

OUR SAMPLES

AI agents in practice

Assessment Copilot

TEACHERS

Curriculum-aligned MCQ, short-answer and reasoning questions with answer keys and rubrics.

10-question assessment: **~90 → ~20 min** Score **95**

Grading Assistant

TEACHERS

Rubric-based marks backed by quotes, actionable feedback and a class misconception report.

30 written answers: **~150 → ~45 min** Score **96**

Self-Study Tutor

STUDENTS

A Socratic tutor that guides students to the answer with questions and hints, never giving it away.

Weekly re-explaining: **~60 → ~20 min** Score **96**

Assignment Advisor

STUDENTS

A writing and project mentor that coaches from first idea to final check, against the rubric.

Draft feedback (30): **~300 → ~60 min** Score **97**

OUR STANDARDS

Scored on a 100-point design rubric

20
Deter-
ministic

20
Verified

20
Structured
output

20
Reusable

20
Concise

Five must-pass gates: identity, no fabrication, defined output, human control, privacy. Time savings are illustrative estimates; scores are provisional design-review scores.
